

Dear Clinton Community Schools Families:

February 9, 2023

As your new superintendent, I wanted to take a moment to communicate where we are with the bond projects. It is an exciting time, and we hope you will share in the excitement related to the facility improvements and opportunities we are making for our kids and our community. I want to thank you, the Clinton Community, for passing the bond and affording our students with the opportunity to have new facilities to continue the great achievements here at CCS!

Since the passing of the 2021 Bond, much planning and work has gone into the design and engineering of the needed improvements to the district's existing facilities. Since the passage and sale of the bonds, district representatives have been meeting with architects and construction managers to plan the different construction/renovation phases and get the work out for bid.

In January 2022, the Board of Education approved final bids for the DPP Preschool addition. Construction began in Spring 2022 and was completed in early 2023. The Preschool welcomed students on January 23, 2023. Attached are photos of the new classrooms and multipurpose space.

Also in the Spring 2022, the design work began to replace the aging HVAC system in the current high school. Bids for new boilers were approved by the Board in Spring 2022 and installed during that Summer. Bids for new Roof Top Units (RTU) were placed and approved by the Board in the Fall 2022. The new RTUs will be installed in the Summer 2023. During their installation the high school will be closed, so please be on the lookout for updates as we get closer to the summer.

The high school addition is next to be completed and will be set to the West of the current high school. Bids were reviewed and finalized and approved at the Special board meeting on Wednesday, February 8, 2023. The new high school addition will include 19 classrooms, STEM lab, band and art room, 3 court gymnasium with elevated walking track, state of the art weight room, media center, cafeteria, newly renovated special education rooms, new classroom equipment and furnishings.

Construction will begin in the Spring of 2023 with the demo of the two-story residential house (board office) and STEM lab. The STEM lab and offices have been relocated so their operations can continue. As part of the new high school addition and renovations, new traffic patterns will be incorporated into the design as well as additional parking. We are very excited to share with you some preliminary drawings of the new high school. Look forward to more updates as construction continues!

Please be patient and pardon our dust!

Kevin Beazley
Superintendent

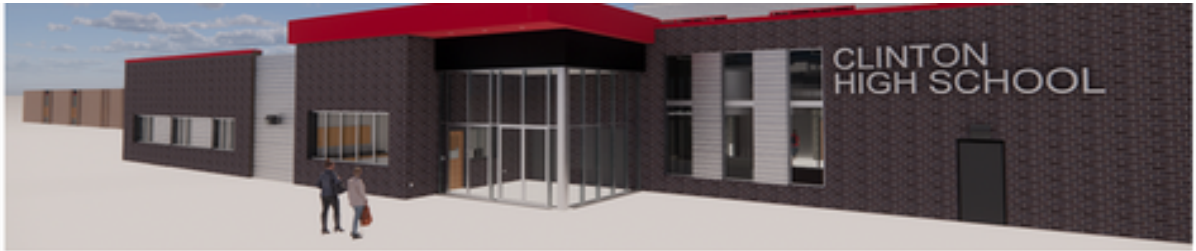

David P. Pray Preschool

The administration team and Board of Education members are very excited to announce that David P. Pray Preschool addition is complete! Parents enjoyed an open house on Thursday, January 19, 2023 to view two new classrooms, a multipurpose room, new classroom equipment and furnishings.

High School Addition

New high school addition construction and renovations is scheduled to begin Spring of 2023. These are early renderings and materials and finishes are still being finalized.
